## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 10 and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Block et al. Note the drain valves are readable on elements 35 and 62. The temperature sensor is readable on element 46 or 84 that measures ambient air. The water within boiler or reservoir 12 is readable on a freezable washer fluid. Also, the actuator and the electrical control unit are readable on elements 44 and 70-72.

### ***Allowable Subject Matter***

Claim 7-9, 11-13 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 17-20 are allowed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure
